The SCIP Program:

SCIP provides a systematic approach for schools and communities to respond to high-risk student behaviors. SCIP demonstrates to students that they are supported in seeking a healthy, productive lifestyle. SCIP facilitates partnerships with schools and community agencies, identifying resources available to address problems related to student misuse of alcohol or other drugs, mental health issues, and other behavioral concerns. Students are referred to the SCIP Team by teachers, parents and other community members. The SCIP Team consists of school representatives trained to identify risk factors, intervene and assist, connect with community agencies and provide support for students and their families. SCIP partners with community behavioral health agencies who provide the initial screening free of charge to students, removing one of the biggest barriers families encounter when accessing services. This process helps students and families see that there is a caring, supportive attitude within the school and their community.

SCIP is funded (16% or \$50,000) from the Strategic Prevention Framework Partnerships for Success States grant (5H79SP083671) & (55% or \$168,837.71) from the SAPTBG (6B08TIO85820-01M002) through the Substance Abuse and Mental Health Services Administration, contracted through the NE DHHS, Div. of Behavioral Health. SCIP also receives (3% or \$10,000) in state funding and (26% or \$82,110) of funding from non-governmental sources. SCIP is funded in part by Lincoln Public Schools and United Way of Lincoln/Lancaster County.
